DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-45, drawn to A Method of Recording Data on an Optical Disc by Dividing each of a Plurality of Error Correction Code (ECC) Blocks into a Plurality of Partitions; and Interleaving the Data from the Partitions so that each of the ECC BLOCKS is Alternately and Equally Selected to Generate a First Recording Block; classified in class 714, subclass 701.
- II. Claims 46 and 47, drawn to A Method of Reproducing Data from a Medium by Reading the Recording Block from the Medium; and Deinterleaving the Read Recording Block, classified in class 714, subclass 763.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I; A Method of Recording Data on an Optical Disc by Dividing each of a Plurality of Error Correction Code (ECC) Blocks into a Plurality of Partitions; and Interleaving the Data from the Partitions so that each of the ECC BLOCKS is Alternately and Equally Selected to Generate a First Recording Block; and Group II; A Method of Reproducing Data from a Medium by Reading the Recording Block from the Medium; and Deinterleaving the Read Recording Block; are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention

Group I; A Method of Recording Data on an Optical Disc by Dividing each of a Plurality of Error Correction Code (ECC) Blocks into a Plurality of Partitions; and Interleaving the Data from the Partitions so that each of the ECC BLOCKS is Alternately and Equally Selected to Generate a First Recording Block; has separate utility such as for providing burst capable error correction encoding. In the instant case, invention Group II; A Method of Reproducing Data from a Medium by Reading the Recording Block from the Medium; and Deinterleaving the Read Recording Block; has separate utility such as decoding data. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Michael Badagliacca on 02 July 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph D. Torres whose telephone number is (703) 308-7066. The examiner can normally be reached on M-F 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Albert Decady can be reached on (703) 305-9595. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
